YASAR ARAFAT

**DIRECTOR – VIVER TECHNOLOGIES |
TECHNOLOGIST | DEVELOPER & HIGHER
EDUCATION MENTOR | FULL-STACK
ARCHITECT | STRATEGIC PROJECT LEAD
& SOCIAL INNOVATION ADVOCATE &
MULTILINGUAL COLLABORATOR |
COMMUNITY BUILDER**

I bring with me a rare synthesis of technical expertise, academic insight, and entrepreneurial vision—dedicated to advancing innovation that is as human as it is intelligent.

I Raised in the culturally rich town of Malerkotla, I have always drawn strength from simplicity, values, and a deep curiosity about how systems—digital and human—interact.

My journey from a student of computing to a leader in education and technology reflects a life built on quiet determination and purposeful impact.

I earned a postgraduate degree in Computer Applications, graduating with top honors. During this time, I developed advanced expertise in software development, digital systems and logical frameworks.

Early in my career, I played a key role in developing impactful solutions, including asset tracking systems, AMC management tools and inventory databases. These projects reflect my ability to blend technical precision with user-centric design.

YASAR ARAFAT

Mr. Yasar Arafat has had the privilege of working with India's premier scientific institutions such as the Council of Scientific and Industrial Research (CSIR). During his tenure, he interned under esteemed scientific leadership, contributing to impactful research and development initiatives. His work focused on leveraging digital technologies to solve real-world challenges, and his exposure to high-caliber research environments helped him gain critical insights into applied science and innovation. This experience not only strengthened his technical foundations but also deepened his commitment to using technology for public good.

his passion for educational advancement led him to serve as an Assistant Professor at Punjabi University's Nawab Sher Mohammad Khan Institute of Advanced Studies. Over nearly three years, he played a vital role in mentoring future technology leaders, instilling both analytical rigor and creative thinking. Through lectures, hands-on sessions, and individual guidance, he fostered a learning culture centered around curiosity, discipline, and innovation. His time at the institute was instrumental in shaping his philosophy on the transformative power of knowledge-sharing and mentorship.

As Director at Viver Technologies, Yasar Arafat has consistently worked at the intersection of innovative design and impactful technology. In collaboration with Grapple Design Inclusive, he played a pivotal role in merging creative design thinking with precise engineering to deliver inclusive, sustainable digital solutions that catered to diverse user needs. Furthering his commitment to socially conscious tech, Yasar also established an IT (Information Technology) company in his hometown of Malerkotla—a region often overlooked for tech-based initiatives. Through this venture, he aims to spark a wave of digital literacy, create employment opportunities, and transform Malerkotla into a hub of innovation, bringing true 'jungle mein mangal' by fostering inclusive growth and technological empowerment in smaller towns.

My Words:

"Every system has a logic; every life has a purpose. I build both with integrity"

This statement isn't just my mantra—it is my method. Whether as a developer, teacher, or director, I work not to simply build programs, but to architect purpose-driven ecosystems that leave
